# Female Infertility

## Emma Dyer

39 years old, US, 2020

I recommend this treatment for women who have low egg counts and poor egg quality. My fertility doctor recommended this and it has helped me get pregnant. There is a longer procedure and it is more painful but it works. The doctor was kind to explain the procedure in detail so that I will not feel any suspicion or be afraid. They also helped me with my travel planning and paperwork, which provided me with a smooth experience..

## Julian Hammer

32 years old, California, 2019

I was getting ready to go on vacation and my friend told me about this place. They offer stem cell therapy, which is an alternative method to IVF. The procedure was an easy and non-invasive alternative to the expensive IVF treatments that I have considered in the past. I can say that I had good results and I'm feeling healthier and happier every day.

## Saniyah Bishara

30 years old, Rajasthan, India, 2022

I knew about the benefits of stem cell therapy for women who are infertile but did not still believe that my own fertility could be improved by using it. The treatment is painless and very safe. I was surprised at the results and would certainly recommend that women of childbearing ages look into it if they are having issues with fertility.

## Sameera

34 years old, UK, 2021

My friend told me about Stem Cell Institute as they offer stem cell therapy, an alternative method to IVF. The procedure was an easy and non-invasive alternative to the expensive IVF treatments I have considered. I have had good results and feel healthier and happier every day.

# Male Infertility

## Paul Matrix

42 years, UK, 2021

Hi, my name is Paul, and I underwent stem cell treatment via Stem Cell Institute. I have tried stem cell therapy to treat my condition, infertility, and surprisingly it worked. They provide the best quality stem cell treatment for infertility in India. I am thankful to them as they also took great care of me and invested much effort in assisting me with my various issues during the treatment.

## Riyaz Ahmad

36 years, Iraq, 2022

I was looking for an affordable and safe therapy for my infertility issues, and I found this. Stem Cell Institute is an affordable stem cell therapy that helped me with my infertility problems. The treatment is less painful and highly effective. I can feel the difference in just a few days. The stem cells help me produce healthy sperm for the first time.

## Billy Whopper

40 years, Belgium, 2019

The treatment was painless, and it was a quick process. After not too much of a wait, the results were apparent. I had heard about the treatment from a friend whose acquaintance recently got it for another condition. I had my doubts initially, but Stem Cell Institute doctors helped me immensely. Thanks again to the whole team of stem cell.

## Mahesh Shah

41 years, India, 2020

If you are looking for something affordable and effective, I highly recommend this treatment, and the best part is that it has no side effects to worry about. We reached the hospital in a few days because of the support they were offering. Their staff picked me up from the airport, and the doctors were well-educated.
