66 Justine

45 years, USA, 2021

I am Justine from USA and I am 45 years of age. I was diagnosed with Coronary artery disease 3 years ago. Of late I have been having experiencing a lot of numbness and tingling in my hands and feet. My blood pressure had also been very unstable and goes up and down very much. I do not have any cramping but heavy feeling in the chest is there and I feel very tired overall. I had a CT scan and some other tests done and then I was detected with cardiovascular disease. I was totally disheartened at that time. However, last year one of my friends told me to about stem cell treatment in India. So, I researched the web and found out about Stem Cell Care India. I came to India for the treatment. I would like to thank the team of SCCI for treating me so well.

66 Jamal

36 years, Bangladesh, 2022

My wife 56yr old husband Mr. Jamal Indonesia is having some serious heart problems. He had a triple bypass surgery and artificial valves were put in around June 2018. His retrieval seemed to be ok after a couple of weeks, but since then he says he does not feel any healthier than he did before his operation. His chest discomforts are becoming more recurrent and his blood pressure is getting shoddier day by day. Doctors also told him that he might be pre diabetic. He was a long time smoker but had quit smoking 2 years ago. I had lost all hopes of him recovering but then I came to India via Stem Cell Care India for seeking stem cell treatment. It has been 3 weeks since my husband's treatment and he has started feeling better now. We are really grateful to the team of SCCI.

Cardiovascular

Linda

53 years, UK, 2022

Pregnancy with my third baby was very upfront and without any difficulties. I was fit and healthy when I went to the hospital in February 2005. Instantaneously after giving birth to Maria, unexpected massive bleeding had befallen. The doctors implemented an embolization of the iliac artery, which later on ruptured. Because of the rupturing, I was in excruciating pain around the clock. My left side was numb. I could barely feel my leg and did not have the power to stand appropriately. Whenever I tried standing, my hips surrendered. The numbness spread across my belly, occasioning in complete numbness of my upper middle body. I could not use the bathroom more than once or twice a week, I suffered from insomnia and groin swelling and I could barely sit. Walking was only imaginable when I could steady myself somewhere and only in the house for very tiny distances. I could not walk up the stairs to the bathroom. My muscles continued to deteriorate and because of my in capacities, I could not leave the house on my own. Naturally I referred all types of doctors. I went to neurologists and to two vascular surgeons. Physiotherapy for my hip and knee did not benefit. I felt awful and I lost hope. Then, I got to know about stem cell treatment in India.

We went to India and undertook stem cell therapy at Stem Cell Care India. Bone marrow encompassing the stem cells was extracted from my hipbone. The separated stem cells were re-vaccinated in two diverse places: into my lower abdomen and into my left hip. I am astonished and actually believe in stem cell therapy. I contemplate this as a complete reversal.

Liver Disorder

Cathie

68 years old, Australia, 2018

Cathie is ecstatic with her stem cell treatment results. She was detected with liver cirrhosis and in trying to find herself an idyllic treatment and an improved quality of life, she decided to try stem cell treatment with SCCI.

Martha

71 years old, Canada, 2019

The improvements Martha and her family have seen have been so wonderful and so fast, much to the wonder of her doctors too after she underwent stem cell therapy in India with SCCI.

Steve

46 years old, UK, 2017

Mr. Steve had been very regular alcohol consumer from past 8 years eliciting in his liver getting preliminary signs of damage. He was soon detected with liver cirrhosis in 2015. Steve decided to treat his condition via stem cell therapy and contacted SCCI for further assistance. His condition has improved a lot after the treatment.

Eddie

35 years old, Canada, 2016

Eddie was suffering from liver cirrhosis from last 2 years. He had been struggling hard with liver disease and he wasn't able to devour his favorite food contentedly. He would like to thank the staff and medical specialists of StemCellCareIndia to give him some relief from this tormenting ailment.

Prakash

58 years old, Guwahati, 2020

Visiting Delhi and contacting SCCI is now a decision Prakash is tremendously happy to have taken. His life has improved drastically after undergoing stem cell treatment of liver cirrhosis.

Kidney Disorder

“

Lorra
31 years old, UK, 2016

Lorra's life went into depression when she was detected with a chronic kidney disorder. She is now thankful to the team of StemCellCareIndia to treat her disease successfully with the help of stem cell therapy.

“

Kennedy
39 years old, Canada, 2017

Kennedy had Chronic Kidney Disease and contacted Stem Cell Care India for treatment. After the treatment, today Kennedy is able to live a full and active life with his family.

“

Iqbal
71 years old, Afghanistan, 2019

Iqbal was diagnosed with kidney disorder 3 ago. He was facing a lot of problem. Len, to end his troubles, he decided to visit India to undergo stem cell therapy with SCCI. After the treatment, his condition improved a lot.

“

Chhaya
42 years old, Rishikesh, 2020

Chhaya was detected for diabetes and CKD. She was under medicine for a very long time. After undergoing stem cell treatment, there is a lot of improvement in her condition.

Thanks to the team of Stem Cell Care India.

“

Robert
57 years old, US, 2018

Robert was diagnosed with Chronic Kidney Disease in 2016. He suffered a lot and then decided to undergo stem cell treatment in India with Stem Cell Care India. He is very happy with the results as his condition improved a lot after the treatment. He is able to live a disease-free life now.

COPD

Genelia

49 years old, Germany, 2016

I was diagnosed with COPD two years ago and usual treatments did not help. I had worry walking up the stairs. I had problem breathing and I coughed too much. After undergoing stem cell treatment with SCCI in India, I have experienced a lot of improvement in my condition.

Salluddin

42 years old, Bangladesh, 2020

A month after treatment with SCCI using s easier to move around and I have a lot more energy. It is much easier to breathe now.

Christopher

62 years old, Canada, 2017

I was a patient of COPD from last 4 years. After undergoing stem cell treatment with SCCI in India, I began walking up the stairs without resting quite frequently. I could talk much better without rapidity of breath.

Gabriella

39 years old, Norway, 2019

I would like to recommend stem cells treatment to individuals with COPD because it worked for me, and it might work for them too, they should try it. They should come here to Stem Cell Care India because everybody is so nice here.

Kristine

32 years old, UK, 2018

I was battling with COPD before I contacted Stem Cell Care India for COPD stem cell treatment. Three months post treatment; I noticed that I started walking much elongated distances before resting. And I did not use my inhaler as much as before.

Erectile Dysfunction

“
Peter

34 years old, UK, 2016

I am Peter and I was suffering from erectile dysfunction. This condition was impeding my sexual life immensely. Now that I am cured, I would like to thank the Stem Cell Care India crew for the stem cell treatment.

“
Mike

98 years old, UK, 2019

Mike was suffering from the problem of erectile dysfunction and had to face lots of embarrassment in front of his wife. He then underwent stem cell therapy for ED with SCCI in India and is now able to enjoy a healthy sexual life with his spouse.

“
Daniel

30 years old, US, 2020

Daniel is very thankful to the SCCI clinic and feels that it has all the high-tech technologies and commendable human resource to lawfully apply stem cell therapies to cure erectile dysfunction.

“
Mohd. Ali

29 years old, Pakistan, 2017

Mohd. Ali was suffering from erectile dysfunction. He underwent prostate surgery a year ago but there wasn't much improvement. After the surgery, he decided to undergo stem cell treatment at Stem Cell Care India and was able to have intercourse again after undergoing stem cell therapy successfully.

“
Brian

35 years old, Canada, 2018

Stem cell treatment has cured erectile and has given Brian a new life of sexual pleasure and self-confidence. He had till now not seen any side-effect and has continued to have good erectile function after 12 months follow-up, indicating that this might be a long-standing solution.

Buerger's

Chelsea

15 years, US, 2022

When Chelsea was 14 years old, she was detected with Burger's Disease. Since then, her life has been very difficult and dreary. After a lot of struggle and hit and trials regarding the treatments, her parents decided to opt for stem cell treatment in India via SCCI. Her parents are very thankful to the team of SCCI as the team handled her case very professionally. After the treatment, Chelsea is able to experience a lot of improvement in her condition and in her life. She is able to live a normal life now.

Paul

38 years, UK, 2021

Paul, 38 years in age, was suffering from Burger's Disease since past years. His life had been very miserable since then. He tried a lot of therapies and medicines but wasn't happy with the outcomes. He finally decided to come to India for getting stem cell treatment. He contacted Stem Cell Care India for this. It has been 6 months to his treatment and he has been able to experience a lot of improvement in her condition. He is very happy with the results and the team of SCCI.

Aafiya

23 years, Delhi, 2022

I never thought that symptoms I ignored, thinking they were not severe, could have been indicators of my suffering from Buerger's disease. It was when I started going through extreme pains that I took notice of the issues at hand and started seeking medical care for my help. After a slew of tests, it was revealed that I was suffering from Buerger's disease, and I was prescribed a heavy prescription of medicines to control my condition. I followed the prescription religiously, but my symptoms were still prevalent. I wanted a cure that could improve my condition. It was then that a friend of mine told me about Stem Cell Care India and how, with their Stem Cell therapy, they could bring betterment to my symptoms. Motivated, I booked my appointments and travelled to India. In India, my treatment was done according to the schedule of my stay. My conditions and symptoms showcased signs of improvement after that. I hope my symptoms improve further and prove the promises made by Stem Cell Care India.

Critical Limb Ischemia

Robin

52 years, Thailand, 2020

Robin from Thailand was suffering from severe critical limb ischemia and his native doctors were not able to control the ailment with medicines and drugs. So they recommended him to go to India for Stem Cell Therapy. Before the stem cell treatment at SCCI, he had the memory problem as a result of his brain trauma and critical limb ischemia. After the treatment at Stem Cell Care India and because of the infusion of the stem cells and PRP (Platelet Rich Plasma), Robin is speedily recovering from his disease. The medical experts at SCCI are continuously keeping watch in his condition during regular follow-up interval and will keep posting any newest development in his condition. He is very thankful to the entire team of SCCI for curing his health.

Paterson

28 years, UK, 2020

I would like to thank the medical experts of StemCellCareIndia for the treatment of Critical Limb Ischemia that made my get rid of this disease in the most easy and affordable manner.

Anwar

36 years, Saudi, 2022

When Anwar was analyzed with critical limb ischemia, his doctors told him that there was nothing they could do for curing him. Anwar's father did not want to accept this and started to search the web for alternate therapies. After far-reaching online research, he found Stem Cell Care India. Anwar's condition had advanced so far that he was hardly able to eat or walk on his own. He felt abandoned by the surgeons. After his arrival in India and the initial examinations, the rigorous therapy began. The therapy worked quite well for Anwar along with other alternative supportive therapies like doing physiotherapy, occupational therapy, speech therapy, and aquatherapy. The efforts were worth it for Anwar. He and his family are really happy with the progressive results. They want to thank the professional team of SCCI.
